
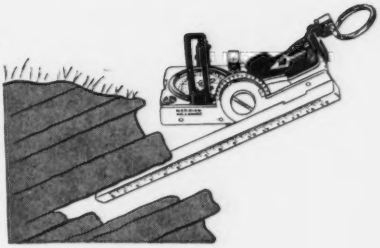
Dimensions 55 × 52 × 30 cm.
Weight with leather case and ruler 370 g.

MERIDIAN 1719 GEOLOGICAL COMPASS

This multi-purpose instrument can be used for geographical orientation, topographical surveys, and all geological measurements. It gives automatically the height of the point sighted up to ±100%, ±50 grades or ±45°. The compass also incorporates a pendulum clinometer and detachable, 3-section 20-cm rule.



For further details of the Meridian range, complete the coupon.

New Edition

INTRODUCTION TO GEOLOGY

Volume 1: Principles
Second Edition

This revised and up-dated edition of a widely welcomed introductory text for university students covers the whole field of geology and deals with geophysics, geochemistry, mineralogy, physical geology, sediment-ology, palaeontology, vulcanicity, structural geology, metamorphism, plutonism and mineral deposition.

704 pages
line and half tone illustrations
65s.

MACMILLAN
Little Essex Street, London W.C. 2

AN INTRODUCTION TO THE PHYSICAL BASIS OF SOIL WATER PHENOMENA

by ERNEST C. CHILDS, *Reader in Soil Physics in the University of Cambridge.*

The book is a theoretical introduction to the study of the complete field of soil water phenomena both static and dynamic in saturated and in unsaturated soil.

approx. 512 pages. approx. 120s.

BASALTS: The Poldervaart Treatise on Rocks of Basaltic composition, Volumes 1 and 2

by HARRY HESS, *Princeton University, and the late* ARNIE POLDERVAART, *Columbia University.*

A summary of the results of experimental work on the effects of water and oxygen pressures in basaltic magmas and related systems, as well as a presentation of some speculations as to the possible values of these variables under natural conditions.

Volume 1. 495 pages. 205s.
Volume 2. 400 pages. 206s.

RADIOMETRIC DATING FOR GEOLOGISTS

edited by E. I. HAMILTON, *Radiological Protection Service, Belmont, Sutton, Surrey, formerly Research Fellow, Department of Geology, Oxford, and* R. M. FARQUHAR, *Associate Professor of Physics, University of Toronto, Canada.*

This book describes the current status of most methods of radiometric dating with particular reference to the significance of the age of a rock or mineral in terms of geological events. The various methods described in the book consider the application of dating methods to individual geological problems. The book explains the restriction imposed by a particular dating method so that gross errors in the interpretation of age can be avoided.

532 pages. 147s.

UNIVERSITY OF QUEENSLAND

Brisbane, Australia

PROFESSOR OF ECONOMIC GEOLOGY

The University invites applications for the position of Professor of Economic Geology. Applicants should possess a degree in Geology and wide experience in the mineral industry. The new Professor is expected to develop vigorous and imaginative training and research in economic (i.e. applied) geology in Queensland at a time when the mineral industry throughout Australia is being established as a major industry. Queensland has very great mineral resources and potential, and the University is well suited for training and research in depth. The Department of Geology and Mineralogy has specialist positions in Geophysics and Petroleum Geology, and strength in most aspects of basic geological training. There are computer, electron-microscopic, mass spectrometric, X-ray and analytical facilities.

The Department of Mining and Metallurgical Engineering is a major teaching and research school and controls an experimental mine and related facilities near campus.

In addition to normal basic training in the Geological sciences, there are undergraduate and post-graduate courses in Applied Geology which the new Professor would control. As the Chair is the second normal Chair in the Department of Geology and Mineralogy, the new Professor will be expected to share general administration with the Head of the Department of Geology and Mineralogy.

The salary will be $A12,000 per annum.

The University provides Superannuation similar to F.S.S.U., Housing Assistance, Study Leave and Travel Grants.

Additional information and application forms will be supplied upon request to the **Secretary-General, Association of Commonwealth Universities, Marlborough House, Pall Mall, London, S.W.1.** Applications close in London and Brisbane on *31st January 1969*.

UNIVERSITY COLLEGE OF TOWNSVILLE

PROFESSOR OF GEOLOGY

The University of Queensland invites applications for the Chair of Geology at the University College of Townsville. Applicants should hold an appropriate higher degree and should possess research and administrative experience at a high level. They should have made a significant contribution in the field of Geology and experience related to the North Queensland environment would be an advantage. The Professor will be responsible for the development of the Department of Geology and Mineralogy (established 1961) and for the planning and development of the relevant subjects and courses.

The University College of Townsville will become an autonomous University in 1970.

The salary will be $A12,000 per annum, plus a Northern Allowance at the rate of $A60 per annum.

The University provides Superannuation similar to F.S.S.U., Housing Assistance, Study Leave and Travel Grants.

Additional information and application forms will be supplied upon request to the **Secretary-General, Association of Commonwealth Universities, Marlborough House, Pall Mall, London, S.W.1.** Applications close in London and Brisbane on *31st December, 1968*.

CONTENTS

ARTICLES

(Figures in bold type denote number of issue)

AJAKAIYE, D. E.
A gravity interpretation of the Liruei Younger Granite Ring Complex of Northern Nigeria, **3,** 256.

ALLEN, J. R. L.
The accumulation of sediment in the lee of ripples and dunes, and the thickness of bottomset deposits, **2,** 166.

ALLEN, P. M.
The stratigraphy of a geosynclinal succession in western Sierra Leone, West Africa, **1,** 62.

ALLEN, P. M., & A. J. REEDMAN,
Stratigraphic classification in Pre-Cambrian rocks, **3,** 290.

ASLIN, C. J.
Echinoid preservation in the Upper Estuarine Limestone of Blisworth, Northamptonshire, **6,** 506.

AUSTIN, R. L.
Five Viséan conodont horizons in the north of England, **4,** 367.

BENJAMIN, R. E. K.
The quartz-plagioclase gneisses of Western Connemara, Ireland, **5,** 456.

BLAKE, D. H.
Gravitational sorting of phenocrysts in some Icelandic intrusive sheets, **2,** 140.

BRYAN, W. B.
Low-potash dacite drift pumice from the Coral Sea, **5,** 431.

BULMAN, O. M. B.
The mode of development of *Isograptus manubriatus* (T. S. Hall), **3,** 211.

CAMPBELL, I. H.
The origin of heteradcumulate and adcumulate textures in the Jimberlana Norite, **4,** 378.

CHAUDHRI, R. S.
Stratigraphy of the Lower Tertiary formations of Panjab Himalayas, **5,** 421.

CLAXTON, C. W.
Mineral layering in the Galway Granite, Connemara, Eire, **2,** 149.

COCKS, L. R. M., & G. WALTON
A large temporary exposure in the Lower Silurian of Shropshire, **4,** 390.

COOPE, G. R.
Coleoptera from the " Arctic Bed " at Barnwell Station, Cambridge, **5,** 482.

CRIMES, T. P.
Cruziana : A stratigraphically useful trace fossil, **4,** 360.

FLEMING, P. D., & R. OFFLER.
Pre-tectonic metamorphic crystallization in the Mt. Lofty Ranges, South Australia, **4,** 356.

GUEST, J. E.
Banded Pumice in a Chilean Ignimbrite, **2,** 177.

HAILE, N. S., & MOHAMMAD BIN AYOB.
Note on radiometric age determination of samples of peat and wood from tin-bearing Quaternary deposits at Sungei Besi Tin Mines, Kuala Lumpur, Selangor, Malaysia, **6,** 519.

HALLAM, A., & N. B. PRICE.
Further notes on the strontium contents of unaltered fossil cephalopod shells **1,** 52.

HAPUARACHCHI, D. J. A. C.
Cordierite and wollastonite-bearing rocks of south-western Ceylon, **4,** 317.

HUTCHISON, R.
Origin of the White Allivalite, Western Cuillin, Isle of Skye, **4,** 338.

HUTT, JANA.
A redescription of the Llandoverian monograptid " *Graptolithus* " *tenuis*, Portlock 1843, **3,** 251.

KATZ, M. B.
Retrograde contact metamorphism in the granulite facies terrain of Mont Tremblant Park, Quebec, Canada, **5,** 487.

KAY, M., & N. ELDREDGE.
Cambrian trilobites in central Newfoundland volcanic belt, **4,** 372.

KAZI, A.
Sedimentology of the Ghazij Formation, Harnai, Baluchistan, **1,** 35.

KRINSLEY, D., & J. DONAHUE.
Pebble surface textures, **6,** 521.

LOWELL, J. D.
Upper Palaeozoic and Lower Mesozoic stratigraphy of south-western Nordaustlandet, Spitsbergen, **4,** 348.

MATSCHINSKI, M.
Alignment of dolines north-west of Lake Constance, Germany, **1,** 56.

MIDDLEMOST, E.
The term farsundite, **4,** 387.

MORGAN, W. R.
On the usage of nepheline-basalt, olivine-nephelinite, olivine-nemafite, and similar rock names, **3,** 247.

NICHOLS, R. A. H.
Structural observations on the Carboniferous Limestone of the North Wales coast, **3,** 216.

PAUL, C. R. C.
Notes on cystoids, **5,** 413.

PHILLIPS, E. R.
Mafic hybrid rocks from the New England Batholith, New South Wales, **2,** 160.

PHILLIPS, W. J.
The crystallization of the teschenite from the Lugar Sill, Ayrshire, **1,** 23.

REID, R. E. H.
Hexactinellid faunas in the chalk of England and Ireland, **1,** 15.
Bathymetric distributions of Calcarea and Hexactinellida in the present and the past, **6,** 546.

RICKARDS, R. B., & A. W. A. RUSHTON.
The thecal form of some slender Llandovery *Monograptus*, **3,** 264.

SAMANTA, B. K.
The Eocene beds of Garo Hills, Assam, India, **2,** 124.

SAXENA, M. N., & S. K. SINGH.
Sub-marine volcanic explosion during the sedimentation of the Baghdhar Limestone of Dalhousie Chamba, Himalaya, **5,** 454.

SHELDON, R. W.
Probable gasteropod tracks from the Kinderscout Grit of Soyland Moor, Yorkshire, **4,** 365.

SHELLEY, D.
A note on the relationship of sillimanite to biotite, **6,** 543.

SIGURDSSON, H.
Petrology of acid xenoliths from Surtsey, **5,** 440.

SOKOLOV, Y. N., A. A. KRASILTCHIKOV, & JU. JA. LIVSHITZ.
The main features of the tectonic structure of Spitsbergen, **2,** 95.

SPARKS, B. W., & R. G. WEST.
Interglacial deposits of Wortwell, Norfolk, **5,** 471.

STEPHENSON, D. G.
An aberrant species of *Fibularia* from Kenya and Madagascar, **2,** 136.

TOGHILL, P.
The stratigraphical relationships of the earliest monograptidae, and the dimorphograptidae, **1,** 46.
A new Lower Llandovery graptolite from Coal Pit Bay, County Down, **4,** 384.

TOZER, E. T., & J. R. PARKER.
Notes on the Triassic biostratigraphy of Svalbard, **6,** 526.

WALKER, A. D.
Protosuchus, *Proterochampsa*, and the origin of phytosaurs and crocodiles, **1,** 1.

WEILL, D. F., & A. H. KUDO.
Initial melting in alkali feldspar–plagioclase–quartz systems, **4,** 325.

WEST, R. G., & D. G. WILSON.
Plant remains from the Corton Beds at Lowestoft, Suffolk, **2,** 116.

WESTGATE, J. A.
Linear sole markings in Pleistocene till, **6,** 501.

23–26. Electron micrograph of Pebble Surface, **6,** *facing* p. 524.
27. Lower Triassic Ammonoids and bivalves from Spitsbergen, **6,** *facing* p. 542.
28. Middle Triassic Ammonoids and bivalves from Spitsbergen, **6,** *facing* p. 542.
29. Lower and Middle Triassic Ammonoids and bivalves from Spitsbergen, **6,** *facing* p. 542.

INSTRUCTIONS TO AUTHORS

Articles submitted for publication in the *Geological Magazine* should be addressed to the Editors at the Sedgwick Museum, Cambridge, not to the Publishers, and sent in duplicate.

Manuscripts should be typewritten, double-spaced, and should be carefully revised. Illustrations should be so drawn as to allow reduction to a maximum size of 155 mm × 110 mm; originals must *not exceed* 465 mm × 330 mm and must be sent in a flat package. Lettering should be such as to be clearly legible after reduction (i.e. equivalent to 5-point as a *minimum* on reduction). Duplicates of illustrations may be prints or reductions. Metric units of the system known as SI are preferred. Illustrations in the text will be referred to as Figures (Fig. 1, 1*a*, etc.), and halftone plates will be referred to also in arabic as Plates 1, 1*a*, etc. Folding plates will not be accepted.

The typescript must be accompanied by a short summary. Authors should follow the rules laid down in the Geological Society of London's *Notes to Authors* (*Proc. geol. Soc. Lond.*, No. 1627, Oct., 1965), with the following exceptions. The total length of a paper should not in general exceed 20 pages of the *Geological Magazine*; preference and priority are given to short papers. Primary headings should be in capitals, centred, with arabic numeral; secondary headings should be in lower case, centred (not underlined), with lower case letter in parentheses; tertiary headings should be in *lower case italics* (*underlined*), at margin, with lower case roman numeral in parentheses, (i), (ii), etc.

No cross-references by page should be given to other parts of the text, but "above" and "below" used (or, if the paper is long, "Section 2(*a*)"). References should be abbreviated in the form of the *World List of Scientific Periodicals* (4th edit., 1963–65) as far as possible, e.g. LAPWORTH, C. 1878. The Moffat Series. *Q. Jl geol. Soc., Lond.*, **34**, 240–343. Unpublished work, e.g. from theses, should normally be referred to in the text as (private communication) and should not be included in the reference list unless already in the press.

Authors will receive 25 reprints free of cost.

GEOLOGICAL MAGAZINE

VOL. 105, NO. 6, NOVEMBER–DECEMBER 1968

CONTENTS PAGES

WESTGATE, J. A.
Linear sole markings in Pleistocene till 501–505

ASLIN, C. J.
Echinoid preservation in the Upper Estuarine Limestone of Blisworth, Northamptonshire 506–518

HAILE, N. S. & BIN AYOB, MOHAMMAD
Note on radiometric age determination of samples of peat and wood from tin-bearing Quaternary deposits at Sungei Besi Tin Mines, Kuala Lumpur, Selangor, Malaysia 519–520

KRINSLEY, D. & DONAHUE, J.
Pebble surface textures 521–525

TOZER, E. T. & PARKER, J. R.
Notes on the Triassic biostratigraphy of Svalbard 526–542

SHELLEY, D.
A note on the relationship of sillimanite to biotite 543–545

REID, R. E. H.
Bathymetric distributions of Calcarea and Hexactinellida in the present and the past 546–559

CORRESPONDENCE:
Isotopic ages of Late Caledonian Granitic Intrusions 560–562
Trace fossils from Namurian Sandstone 562

REVIEWS 562–569

PUBLICATIONS RECEIVED 569–572

INDEX 573–579
